

Additional data file 7

Additional figure 7. Effect of CD4⁺ T cell reconstitution on Treg cell number in *Tnfrsf4*^{Cre/+} *R26*^{Dta/+} mice. Absolute numbers of Treg cells (CD25⁺CD4⁺) in lymphoid organs of DTA and WT mice, which did not receive CD4⁺ T cells (-) or DTA and WT mice 7 weeks after transfer of wild-type CD45.1⁺CD4⁺ T cells (+ WT CD4). Values represent the mean (±SEM) of 5-6 mice per group pooled from 2 independent adoptive transfer experiments.
